Abstract

Hello, I am Jeremy, and \LaTeX is so cool. I actually really love this class, and I hope I end up learning a lot. It seems so useful and also fun. \LaTeX to me is a lot more intuitive than typesetting on Microsoft Word or Google Docs, and also looks to be a lot more modular and customizable. I hope in my mathematics class and also in the future, I end up using this a lot more. Also, the documents \LaTeX produces are so beautiful.

Hello **world** again!

1 hey shawties

1.1 hey mamas

1.2 i am jeremy
